CC: David.A.Ebner@nwp01.usace.army.mil

Gentlemen,
Dave Ebner indicated we're to be speaking today. Please let me provide some background information to assist in our discussions.

This information consists of 5 Emails.

1. ITB Project Interim Report. This document pulls the rest together and explains where I think we are, what we've learned, and what remains to be done. Some analysis of last month's field trip to McNary data is presented.
2. Appendix I, Software Screen Gallery is a visual listing of the software features in the ITB in October, 2003.
3. Appendix II, Software Report, originally sent to HDC in October 2003 to show the state of development of ITB software at that time.
4. Appendix III, ITB PostProcessor Output graph. (This is a first draft of the analysis package utilizing the data from last month's ITB field test.)
5. Appendix IV, additions to SOW and delays incurred.

I look forward to your call,
Best,
Doug
